

LIMA

Rugged Input Controller

Tough · Reliable · Proven

The LIMA creates a unique interface for Liteye's 600 family of products. The unit interlocks around the 600 and offers user mouse control for handheld applications. Together the units allow for remote viewing when a standard monitor is not available or practical. It also allows for private covert viewing use.

The Liteye family of products is made for many industry niches. These include but are not limited to, medical, industrial and military arenas.

many different accessories packages and custom firmware builds create a large selection to fit the COTS, MOTS and other custom application.

Feel free to talk to our sales representatives to find the products to fit your needs.
